

01-

$$(1) - 2) \cdot 180^\circ = 74 \cdot 180^\circ = 720^\circ$$

$$A + B + D + E = 135.4$$

$$A + B + D + E = 540$$

Somando ângulos internos -  $(A+B+D+E) = F+C$   
 $720^\circ - 540 = F+C$

$$F+C = 180^\circ$$

$$\Delta AFE \Rightarrow (AE)^2 = (AF)^2 + (FE)^2$$

$$AE = \sqrt{50}$$

$$AE = 5\sqrt{2}$$

$$\text{Área } ABED = 5.5\sqrt{2}$$

$$\hookrightarrow \text{Área } ABCD = 25\sqrt{2}$$

$$\text{Área hexágono} = \Delta AFE + \Delta BDE + \text{Área } ABCD$$

$$\text{Área hexágono} = 25\sqrt{2} + 25/2 + 25/2$$

$$\text{Área hexágono} = 25(\sqrt{2} + 1)$$

02-

$$\Delta V_{\text{eq}} \Delta \text{equilátero} = \frac{l^2 \sqrt{3}}{4}$$

$$16\sqrt{3} = \frac{l^2 \sqrt{3}}{4}$$

$$l^2 = 64 \Rightarrow l_t = 8 \text{ m}$$

$$\Delta_{\text{Eh}} = \frac{l\sqrt{3}}{2} \Rightarrow \frac{8\sqrt{3}}{2} = \Delta_{\text{Eh}} = 4\sqrt{3}$$

$\Delta_{\text{Eh}}$  = diagonal que divide

$$4\sqrt{3} = l\sqrt{2}$$

$$l_q = \frac{4\sqrt{3}}{\sqrt{2}} \cdot \frac{\sqrt{2}}{\sqrt{2}} \Rightarrow l_q = 2\sqrt{6}$$

$$l_q \cdot l_q = A$$

$$A = 2\sqrt{6} \cdot 2\sqrt{6}$$

$$A = 24 \text{ m}^2$$

03

$$APC + APB + BPC = ABC \Rightarrow \text{Area}$$

$$2h_1/2 + 2h_2/2 + 2h_3/2 = \sqrt{3}$$

$$h_1 + h_2 + h_3 = \sqrt{3}$$

Q4-

$$MN = \frac{1}{2} BC$$

$$\triangle ABC \sim \triangle AMN$$

$$A \sim A$$

$$\frac{\text{Area } \triangle AMN}{\text{Area } \triangle ABC} = \left(\frac{1}{2}\right)^2$$

$$\boxed{\text{Area } \triangle AMN = \frac{\text{Area } \triangle ABC}{4}}$$

$$\text{Area } \triangle ABC = X + \text{Area } \triangle AMN$$

$$96 = X + 96/4$$

$$X = 72 \text{ cm}^2$$

Q5-

$$AB^2 = BC^2 + AC^2$$

$$10^2 = 6^2 + AC^2$$

$$AC = 8 \text{ cm}$$

$$\Delta ABC = BC \cdot AC / 2$$

$$\Delta ABC = 6 \cdot 8 / 2$$

$$\Delta ABC = 24 \text{ cm}^2$$

06-

$$l = r$$

$$\hookrightarrow \Delta \text{equilátero} = \frac{l^2 \sqrt{3}}{4}$$

$$\hookrightarrow \Delta \text{equilátero} = \frac{r^2 \sqrt{3}}{4}$$

$$\hookrightarrow \Delta \text{equilátero} = \frac{4^2 \sqrt{3}}{4}$$

$$(\hookrightarrow \Delta \text{equilátero})^2 = 4$$

$$\hookrightarrow \Delta \text{equilátero} = 4\sqrt{3}$$

$$4 = (4\sqrt{3})^2$$

$$4 = 40$$
